

VIBRATION TEST SYSTEMS

HBK Assured Service Contracts for Vibration Test Systems

Regular preventative maintenance is essential to keep vibration test systems at the highest level of performance, safety and reliability. The HBK Assured service agreements and preventative maintenance plans provide you with peace of mind that your investment is operating at optimal capacity, allowing you to concentrate on other business-critical activities.

HBK Assured Service Contracts for Vibration Test Systems

KEEP YOUR SYSTEMS AT THE HIGHEST LEVEL OF PERFORMANCE AND RELIABILITY

Mechanical systems with moving parts require preventative maintenance and servicing from time to time, which can be addressed most effectively with a planned maintenance schedule and service contract. To protect your investment and maximize uptime, Hottinger Brüel & Kjær offers a range of service contracts to ensure the high performance of your systems.

Experienced Service Personnel

All services are performed worldwide by a highly experienced service group with the highest level of expertise in the industry and an extensive level of training.

Highest Test Quality

Consistent professional service improves control of performance, ensures maximum uptime, and improves consistency and quality of test results.

Reliable Spare Parts

All replacement and spare parts installed under the service contracts are original Hottinger Brüel & Kjær parts, manufactured to exact tolerances.

CHOOSE A MAINTENANCE PLAN THAT SUITS YOUR NEEDS

The HBK Assured service agreement and preventative maintenance plans provide an affordable and known annual cost by minimizing the risk of unexpected operational service costs. All plans include support and annual service maintenance, covering inspections, testing, and verification or adjustment of critical components.
